

Altiris Client Management Suite 7

An Integrated cast of All-Stars - Now you don't have to choose between best-in-class technology or integration. Client Management Suite 7.0 integrates the best of Symantec Ghost, Symantec pcAnywhere, Workspace Virtualization (Software Virtualization Solution), Wise, and Deployment Solution into a single, comprehensive client systems management solution.

What's NEW in CMS 7

Deployment Solution™ powered by Ghost™

Deployment Solution™ powered by Ghost helps cut the cost of deploying and managing desktops, notebooks, and handheld devices in your environment with an easy-to-use, integrated solution that provides operating system deployment, configuration, computer "personality" migrations, and software deployment across hardware platforms and operating system types.

Symantec Workspace Virtualization™

Software Virtualization Solution™ for Clients is a revolutionary approach to software management. By placing applications and data into managed units called Virtual Software Packages, Software Virtualization Solution allows you to instantly activate, deactivate or reset applications and to completely avoid conflicts between applications, without altering the base Windows installation.

pcAnywhere™ Solution

Award-winning Symantec pcAnywhere™ gives technical support personnel powerful remote management and problem-solving tools. Problems can be diagnosed quickly and corrected on desktops, laptops, and servers by viewing and controlling them remotely. If necessary, they can even run crucial operating system utilities on a remote system. Robust file-transfer capabilities include support for efficient batch transfers.

Real Time System Manager Solution™

Real-Time System Manager Solution™ helps you manage computers using Microsoft Windows Management Instrumentation (WMI), Intel Active Management Technology (AMT), and/or Intel vPro

Technology. Using Real-Time System Manager Solution, you can view detailed real-time information about a managed computer and perform various administrative tasks, such as restarting the computer, resetting the password, running a port scan, terminating a process, and more.

Returning All-Stars:

Inventory Solution® for Clients

Inventory Solution® for Clients empowers you to take control of your Windows and Macintosh* clients' hardware and software from the convenience of your Web browser. Extensible agents allow you to manage what data is captured and how it's reported, while zero-footprint technology and built-in Web Reports™ enable Inventory Solution to provide you with a day-one return on your investment.*

Software Management Solution™ for Clients

Software Delivery Solution™ for Clients provides policy-based software distribution for applications and other software change packages throughout your organization. Software Delivery Solution provides policy-based distribution to LAN-based and remote and mobile clients from a single interface, as well as self-healing, conflict analysis, and other on-going software management.

Patch Management Solution™ for Clients

Patch Management Solution™ allows you to proactively manage patches and software updates by automating the collection, analysis, and delivery of patches across your enterprise. The solution can significantly help you decrease the costs involved in delivering patches throughout your enterprise and integrates with Altiris Recovery Solution™ for stable-state rollback.

The following are components to CMS 7 and cannot be sold individually:

- Wise Toolkit
- Application Management Solution
- Application Metering Solution
