

Extending Symantec Ghost with Symantec's Altiris Client Management Suite

Extending Ghost with Client Management Suite

Got Ghost? The award winning Symantec Ghost Solution Suite is the industry-leading tool for imaging and deploying PC's in the IT environment. As the IT environment grows and becomes more complex over time, you will want to extend Ghost by adding the Altiris Client Management Suite (CMS) to provide complete IT lifecycle management.

You can continue to utilize the imaging and deployment features Ghost is famous for and in addition receive software packaging and delivery, patch management, backup and recovery, comprehensive hardware and software inventory, troubleshooting and remediation tools and more. Discover how Altiris Client Management Suite can reduce the cost of owning PC's in your IT environment today.

Benefits of Symantec's Altiris Client Management Suite for Symantec Ghost Solution Customers:

Extend and Enhance existing Ghost investment – Organizations that have an investment in Ghost images will be able to utilize this investment when adding Altiris Client Management Suite

Reduce the cost of managing client systems - IT managers face ever increasing requirements but never an increase in budget. Automate time-consuming and redundant tasks to reduce the overall costs of deploying, maintaining and support client systems throughout your organization

Be confident in a complex world - IT managers live in a complex world with many applications, differing hardware, multiple network systems, and end-users who like to introduce chaos into the environment. With Altiris Client Management Suite, you will be able to gain control and bring confidence in this complex world.

Symantec Platinum Partner

Ghost is ONE piece of a BIG solution

Discovery and Inventory

Inventory Solution® for Clients

Inventory Solution® for Clients empowers you to take control of your clients' hardware and software from your Web browser. Extensible agents allow you to manage what data is captured and how it's reported, while zero-footprint technology and built-in Web Reports™ enable Inventory Solution to provide you with a day-one return on your investment.

Deployment and Migration

Deployment Solution™ powered by Ghost™

Deployment Solution™ powered by Ghost helps cut the cost of deploying and managing desktops, notebooks, and handheld devices in your environment.

Hardware Management

Real Time System Manager Solution™

Real-Time System Manager Solution™ helps you manage computers using Microsoft Windows Management Instrumentation (WMI), Intel Active Management Technology (AMT), and/or Intel vPro Technology.

Remote Assistance

pcAnywhere™ Solution

Award-winning Symantec pcAnywhere™ gives technical support personnel powerful remote management and problem-solving tools. Problems can be diagnosed quickly and corrected on desktops, laptops, and servers by viewing and controlling them remotely.

Patch Management

Patch Management Solution™ for Clients

Patch Management Solution™ allows you to proactively manage patches and software updates by automating the collection, analysis, and delivery of patches across your enterprise.

Platform Extensions

Because it's built on a unified management platform, it's easy to add solutions that go beyond client systems management. Additions include: Wise Package Studio Professional, Altiris Software Virtualization Studio Professional, Altiris Recovery Solution Professional. You can even use CMS7 to manage Endpoint Protection, Backup Exec System Recovery, and many other Symantec Solutions!

Software Virtualization and Management

Symantec Workspace Virtualization™

Software Virtualization Solution™ allows you to instantly activate, deactivate or reset virtual application packages and to completely avoid conflicts between applications, without altering the base Windows installation.
